. that didnt work, and i wasnt sure what was wrong with xsane because it couldnt find a scanner. so i just went to karmic live cd and it installed and the scan worked. emma: I'm new to xchat !karmic | karolczanik karolczanik: Ubuntu 9.10 (Karmic Koala) was the eleventh release of Ubuntu. !End-Of-Life on April 29th 2011, see for details. paul68: Its just like chatzilla if you have used chatzilla. auronandace: thanks :) karolczanik, the RC will be out when it's ready for the people karolczanik: what exactly is the problem you are having? auronandace: I've run into a "certain" error message when trying to install Ubuntu 12.04 on an external USB 3.0 hard drive that I've been using with my desktop. When I boot with it plugged in, and the USB 3.0 port is enabled, it seems like the USB drive is loading fine (or at least trying to) but then I get a message telling me that /media/disk has been mounted read-only. This is not the case. ObrienDave: it will be released when it is ready for the people. and it's currently not ready paul68, i think you should try and get ahold of someone that is more familiar with karamba/ksane !info karamba

---

karamba (source: karamba): complete X11-based desktop environment for POSIX systems. In component universe, is optional.  
Version 0.9.3-7 (raring), package size 217 kB, installed size 652 kB !info ksane Package ksane does not exist in raring  
ObrienDave: auronandace now that I'm back with the laptop is there 82157476af
